## DID YOU KNOW?

As part of your baby's routine immunization schedule, they may receive 3 doses\* of Pprevnar 20. **It is important** to follow the instructions of your doctor and/or nurse so that your child completes the full course of vaccinations. Pprevnar 20 is given more than once, across multiple visits, to build up your child's immune system over time.

\* Infants at high risk for invasive pneumococcal disease may need 4 doses of Pprevnar 20. Please speak to your doctor for more information.

### At 2 months

#### Your baby starts to become a little boxer!

They will enjoy batting at colourful objects hanging in front of them, making this a great time to introduce them to baby jungle gym mat toys. They've also discovered their hands and fingers, and may be able to grasp a toy for a short time.

## DID YOU KNOW?

From birth, your baby's immune system is a fighting machine capable of **creating antibodies** to recognize and respond to harmful bacteria. Pevnar 20 helps your baby's body make its own antibodies, which protect against diseases caused by 20 types of the bacteria *Streptococcus pneumoniae*.

### At 4 months

#### Your baby is starting to become a little chatterbox!

You'll notice many more "baba" and "gaga" sounds as they experiment with a range of vocal gymnastics. Let your baby finish their chatter, then respond as if you're having a real conversation—they'll be delighted by the interaction!

Have more questions? Check out our brochure inside your kit or visit [Pevnar20Infant.ca](https://www.Pevnar20Infant.ca)!

## DID YOU KNOW?

Babies and children in childcare settings are susceptible to invasive pneumococcal disease (IPD) because they are more likely to share items they usually put in their mouths, such as toys, with other children. That's why it's so important to help **prevent** IPD before it **starts** with a vaccine like Pprevnar 20.

Pprevnar 20 does not treat active IPD infections.

As with any vaccine, Pprevnar 20 will not protect 100% of those who receive the vaccine.

### At 12 months

**Your baby becomes a cruiser!** By around 11 or 12 months, your baby starts using furniture to steady themselves as they practice moving around on their own two feet. Your baby may even already have taken their first unassisted steps!

Have more questions? Check out our brochure inside your kit or visit **[Pprevnar20Infant.ca](https://www.Pprevnar20Infant.ca)**
